To Whom It May Concern:

The Non-Stop Parts Basket meets all OSHA and ANSI requirements for a man basket when used with the Guardrail Kit and appropriate fall protection gear.

- The forks must pass through the fork pockets on the Basket.
- The Basket must be tied to the forklift with the safety chain, which doubles as a tie-off point for the workers' fall protection gear.
- Workers must use appropriate fall protection gear.
- Maximum load: 800 pounds (workers, tools, and materials).

If any other questions arise, please call me directly.

Sincerely,

Justin B. Breithaupt, Jr.
Non-Stop Scaffolding, Inc.
