

## Non-Stop Parts Basket/Man Basket Instructions

1. Be sure the forks pass through the fork pockets welded to the bottom of the parts basket/man basket. See photo 1.
2. Attach the basket to the forklift with the chain provided. This will keep the basket from sliding off the forks. Attach the workers' harnesses to the chain. See photo 2.
3. Install the guardrail posts and guardrails. You can use the guardrails provided, or use 2x4s approved for guardrails. See photo 1.

Parts Baskets stack 3-high and 3-wide on an 8-foot-wide trailer. They lock together when stacked. Some of our customers own a lot of them and use them to keep equipment for different jobs separated. Put the baskets for the first stop on top, the second stop in the middle, etc.
